

OUR APPROACH IS SIMPLE.

.....
ASSESS + ANALYZE + IMPROVE

Visual and Sensorimotor Skills can be Measured and Improved

IMPROVE SENSORY PERFORMANCE

Roggy Eye Clinic utilizes proven vision and sensorimotor improvement methodologies with state-of-the-art technology to help athletes see better and perform better.

Scientific research shows that these skills are modifiable. Everyone from the injured to the high performer can be trained to sense sharper, perceive quicker, and react faster.

Visual Skills Important in Sports

- Visual Clarity
- Contrast Sensitivity
- Depth Perception
- Speed of Focus
- Reaction Time
- Eye-Hand Coordination
- Peripheral Awareness
- Spatial Localization
- Eye Movement Tracking

These skills can be trained for both sports and learning!

90% OF THE TRANSMITTED INFORMATION TO THE BRAIN IS VISUAL!

SPORTS VISION TRAINING

Vision accounts for 2/3 of the electrical activity of the brain. 40% of all nerve fibers connected to the brain are from the retina.

How Vision Enhances Athletic Performance

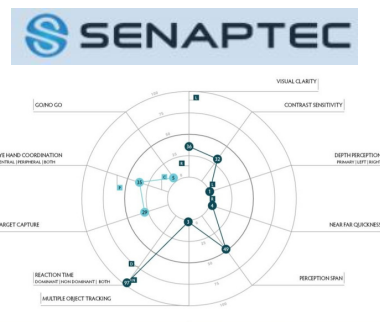

Sports vision training can better prepare an athlete for competition by dramatically improving the athlete's peripheral awareness, body reaction, eye-hand and eye-foot coordination, visual perceptual skills, visual clarity, eye teaming, focusing, and tracking. Sports vision training should be in tandem with the overall conditioning and training of the athlete.

VISION DRIVES ACTION!

Sports Vision Program

Assessment: Clinical evaluation of binocular skills critical for athletic success by the doctor *plus* individualized instrument visual-motor and visual-sensory skill evaluation.

Analysis: Results are analyzed by the doctor and by Senaptec's database, separating each athlete by sport, position, and competition level. Strengths, weaknesses, and potential areas for visual growth are identified.

Training (optimization): CUSTOMIZED sports vision training program to improve visual motor and sensory performance. All sports vision training will be individualized, administered by vision therapists under the doctor's direction.

6-week Sports Vision Program

Cost: \$325

- Initial Assessment, Analysis, & Consultation
- Three 1:1 sessions with a trained sports vision therapist
- Final Assessment with the doctor
- Individualized Maintenance program
- All vision materials and equipment
- Access to the vision therapist for continued growth

OUR SPECIALTY!

Roggy Eye Clinic specializes in working with athletes of all ages and levels. From junior high students to Division 1 collegiate programs to professional athletes, functional athletic performance can be improved through a specialized vision training program that delivers customized sports vision training protocols with proven, measurable results utilizing highly-specialized clinical and technological systems. We can help student athletes perform more consistently and at a higher level, both on and off the field.
